

Bespoke Engraving Capabilities.

“We Have Mastered The Art Of Scratching”

Control & Mimic Panels:

Our Custom panels are available in a variety of materials and are generally manufactured to CAD engineering drawings. Panels are machined to incorporate any shape required and are machine engraved to ensure permanent marking. We also have the ability to engrave directly onto Polycarb or Fibre enclosure doors. As well as engraving, our machines have profile milling capabilities, resulting in the entire project being done on the same machine to fine tolerances. This procedure saves time and money as well as ensuring high accuracy.

Measuring Guages:

Our Measuring Guages are machined to any shape required, machine engraved for permanent marking and are available in a variety of materials. Our machinery is very accurate and we are used to working from CAD engineering drawings to fine tolerances. As with all products, our measuring gauges are final inspected, to ensure they are error free, before being received by our customers.

We have also manufactured a large range of fishing gauges for the local fishing authorities.

Cut Out Letters / Numbers:

The traditional look and highly prestigious appeal of cut out letters enhances the image of any organisation. With the aid of our advanced engraving software, any letter that can be engraved, can also be cut out, up to 1 Metre high and supplied in a variety of materials.

We supply and ship complete projects with simple D.I.Y instructions countrywide.

A Few Examples Of The Variety Of Products We Engrave & Manufacture:

Braille: We pride ourselves in having developed Control Panels & Signage for the visually impaired.

All **Electrical Labeling** requirements - Legends, Distribution Boards, Busbars
(**Labels** are custom made to clients specifications - simply email width, height and text requirements with preferred material and material colour to us. Extraordinary turn around times).

Nameplates, Deskplates & Doctors Plaques.

Identification, Warning & Informative Signage.

Stencils - Using most materials.

Plaques - Stainless Steel, Brass, Copper and Aluminium.

Routed Wood Signs

Flooring Templates for Carpet, Vinyl or Alternative Coverings

Architectural & Corporate Signage

Light Aircraft Control Panels - Extensive Work On Huey Helicopter Control Panel Refurbishment

Signage Letters - Individual or Logos 1 Metre High X Any Width

Key Rings - Large Runs Our Speciality

Machine Faceplates - Wired to Components Optional

Mimic Panels - Wired to Components Optional

Security Identification

Plumbing & Electrical Tags.
